CHOOSE CITOSTEEL FOR EXCELLENT AND EFFICIENT MIG/MAG AND MMA WELDING

CITOSTEEL COMPACT RANGE are built on latest Oerlikon power source platform, ensuring optimal **MIG/MAG** and **MMA** welding performance with excellent power cost efficiency.

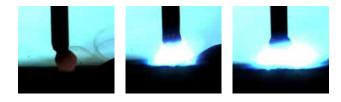

Six models are available: 250A, 320A, 380A and 450A power sources with a choice of either the C panel (255C & 325C) or the C PRO panel (255C PRO, 325C PRO, 385C PRO & 455C PRO), that meet most customer's needs and cover a wide range welding applications.

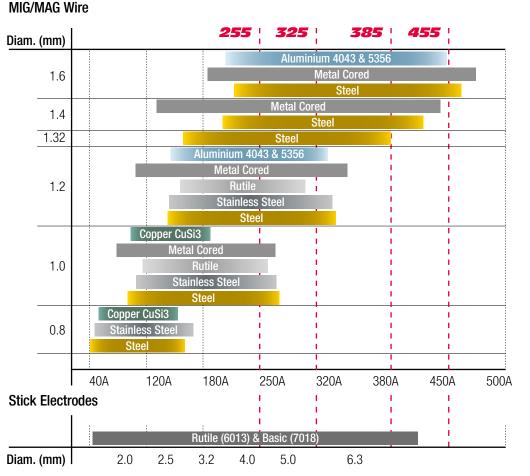

CITOSTEEL 385C PRO & 455C PRO have the option of water cooling by simply adding the new COOLARC[®] 26.

PREMIUM ARC PERFORMANCE

- ARC INITIATION Repeatable arc ignition with outstanding arc characteristics.
- ARC STABILITY Excellent arc stability, ensuring a smooth droplet transfer, with reduced spatter.
- ARC DYNAMICS Rapid parameter adjustment allowing variability under welding conditions.

INNOVATIVE INTUITIVE INTERFACES

Simple navigation also when using welding gloves

C VERSION

- Manual setup for voltage and wire feed speed
- Quick Welding Process & Shielding Gas selection button
- Quick access to the most commonly used welding parameters (Inductance, 2/4 Stroke, Run-in, Burn-back)

C PRO VERSION

- Easy setting by selecting process & material thickness
- Synergic lines, Limits, Memories
- Visualisation of useful information (ARCFXTM joint configuration, welding defects...)
- Multi-language navigation menu
- Full Support Menu: technical data, accessories, instructions, safety

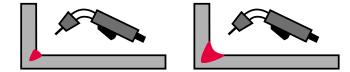

Easy Process Selection

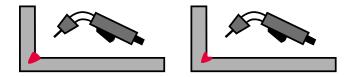

ARCFX™ TECHNOLOGY

Patented technology providing instant graphical feedback on how Wire Feed Speed and Voltage affect rhe weld outcome.

How does wire feed speed affect my weld?

Wire Feed Speed – As your wire feed speed is increased the weld penetration increases, and as your wire feed speed is decreased, the weld penetration decreases. Notice the changes to the weld puddle in the image shown abowe.

How does voltage affect my weld?

Voltage – Arc voltage affects the arc length. At the same wire feed speed, as voltage increases, the arc length gets longer and as voltage decreases, the arc length gets shorter. The length of the arc in turn determines the width and size of the arc cone. Notice the changes to the weld puddle in the image shown above.

PERFECT FEEDABILITY

4 rolls/ all driven:

no wire deformation

• eliminates wire slipping

Optimized wire positioning: improved arc stability & reduced

gun vibration

LED lights:

notification for

READY FOR TOMORROW

The new European regulation for Welding Equipment will soon be implemented and will require a phase out of conventional equipment.

The new **CITOSTEEL** family complies with this regulation by having a minimum power source efficiency of 85% & an idle consumption which is below the new tolerated limit.

* 350A, 2 shifts a day with 30% operator factor

Depending on your application, welding parameters & duty cycle,

you can save up 3.700 kWh* (~480€) per year and per equipment.

ALL MACHINES

BUILT FOR THE **HEAVIEST INDUSTRIAL CONDITIONS**

Developed and tested under the hardest conditions (TRUE HD) to grant the reliability you need.

- PCB board made in Lincoln Electric Company
- Fully encapsulated and vertical mounted
- Capable of surviving the harshest testing conditions
- Varnished and potted electronic boards

COOLARC® 26

More functions and features

Built-in handle for easy transportation

Cooler fully controlled by power source: AUTO/ON/OFF for better energy savings and extended service life

Coolant filter keep coolant clean

LED lights inside for better visibility of the coolant level

Flow sensor inside for gun protection

New COOLARC[®] 26 cooler fully controlled by power source

Cooler Menu is available when cooler is connected

Settings: 3 Modes of operation available:

1. AUTO 2. OFF 3. ON

CUSTOMER ASSISTANCE POLICY

The business of Lincoln Electric is manufacturing and selling high quality welding equipment, consumables, and cutting equipment. Our challenge is to meet the needs of our customers and to exceed their expectations. On occasion, purchasers may ask Lincoln Electric for information or advice about their use of our products. Our employees respond to inquiries to the best of their ability based on information provided to them by the customers and the knowledge they may have concerning the application. Our employees, however, are not in a position to verify the information provided or to evaluate the engineering requirements for the particular weldment. Accordingly, Lincoln Electric does not warrant or guarantee or assume any liability with respect to such information or advice. Moreover, the provision of such information or advice does not create, expand, or alter any warranty on our products. Any express or implied warranty that might arise from the information or advice, including any implied warranty of merchantability or any warranty of fitness for any customers' particular purpose is specifically disclaimed.

Lincoln Electric is a responsive manufacturer, but the selection and use of specific products sold by Lincoln Electric is solely within the control of, and remains the sole responsibility of the customer. Many variables beyond the control of Lincoln Electric affect the results obtained in applying these types of fabrication methods and service requirements.

Subject to Change - This information is accurate to the best of our knowledge at the time of printing. Please refer to www.lincolnelectriceurope.com for any updated information.
